

COMUNE DI CAROVIGNO

OGGETTO:
**PROGETTO PER LA REALIZZAZIONE DI UNA STRUTTURA
RICETTIVA ALBERGHIERA RIENTRANTE NELLA CAT. "ALBERGHI
AI SENSI DELLA L.R. N. 11 DEL 11/02/1999 TITOLO I ART. 3
SITA IN AGRO DI CAROVIGNO C.da "PEZZA MORELLI"**

COMITATO ENZA:
S.A.C.L.A.F.E. 8.r.l.
VIA N.BIXIO, 5 Via Etma, 32 Carovigno

ELABORATO:
PIANTA LIVELLO TERRENO 1:100

STUDIO DI PROGETTAZIONE
Arch. Ernesto L'Abbate

Damiano Chiesa, 85 Carovigno
 0884 004700 Fax 0884 000000 Cell 0884 000000

11/20/2016 11:56

AROVIGNO 12 GEN.
del Territorio

S.A. CLAFFE S.r.l.
Via Eina 32 - 50139 Bologna

Pharmaceutical Research and Development (R&D) is the primary driver of new drug discovery and development. It is a highly competitive and capital-intensive industry, with significant barriers to entry. The R&D process is long and costly, typically taking 10-15 years and costing billions of dollars to bring a new drug to market. This process involves identifying a target, designing a molecule, synthesizing it, and testing it for safety and efficacy. The high cost and risk of R&D are reflected in the high failure rate of new drug applications (NDAs), with only about 10% of drugs that enter clinical trials eventually reaching the market. The R&D process is also heavily influenced by regulatory requirements, which can vary significantly between countries. The pharmaceutical industry is also characterized by a high degree of concentration, with a few large companies dominating the market. This concentration is driven by the high costs of R&D and the need for economies of scale. The industry is also highly regulated, with strict requirements for the safety and efficacy of drugs. The pharmaceutical industry is a key driver of economic growth and innovation, and it plays a critical role in the development of new treatments for a wide range of diseases. The industry is also a major employer, with thousands of people working in research, development, manufacturing, and distribution. The pharmaceutical industry is a complex and dynamic industry, and it is constantly evolving. The industry is facing a number of challenges, including the need to develop new treatments for rare diseases, the need to improve the efficiency of the R&D process, and the need to address the issue of drug pricing. The pharmaceutical industry is a key driver of economic growth and innovation, and it plays a critical role in the development of new treatments for a wide range of diseases.
